

Data sheet LED Valance

Product description:

Our LED valance is composed of an ultra-fine and light plate, patented, that we insert into a valance doubled and manufactured by us. The text comes out in luminous light and is protected by a very thin polycarbonate, it is a waterproof valance. We manufacture the lighting of your valance according to your graphic charter. For more details on the installation of the valance, please refer to the installation sheet.

We offer you a product 100% made in France and offer a one year warranty. Patented product. After validation of the quotation we send you a BAT before any production launch.
